PRODUCT LAUNCHES

Urban chic

BONIA's latest line of menswear takes inspiration from daily commutes: transportation on bicycles, motorbikes, cars, taxis or buses. Three main colours — mélange, black and white — feature in the collection, which strikes a perfect balance between relaxed tailoring and urban streetwear designs. A further Navajo touch gives the clothing an edge. Immaculate tailoring is evident throughout and styles range from lightweight polos to plaited cardigans and retro knit vests. Repetitive grid transfer stitches and geometrics give the line a young and trendy finish.

Out of this world

Oris is pleased to introduce a limited-edition timepiece inspired by Tycho Brahe, the 16th-century Danish nobleman and astronomer. The 42mm stainless steel Oris Tycho Brahe Limited Edition originates from the Oris Artix family and its caseback is beautifully engraved with a drawing of the Tychonic system.

Featuring a rare complication, the Oris-developed Pointer Moon indicates the phases of the moon over the 29.5-day lunar cycle... jumping forward every half a day and showing the phases of the moon more accurately than a traditional moon phase display. Behind this landmark innovation is Oris' Calibre 761, based on the Sellita SW220.

Welcoming spring

Celebrating spring and Chinese New Year, Metrojaya offers Southeast Asia's cultural artifacts in the form of lacquerware, Chinoiserie prints and exquisite Japanese art. Be spoiled for choice in creating decadent interior settings: from a grand reunion table featuring Living Quarters' array of Chinoiserie porcelain, glass and lacquerware crockery to Japanese thematic clay pots, traditional blue-and-white porcelain crockery and assorted candy containers.

In the living room, embroidered cushions, decorative ornaments and Chinoiserie-inspired jewellery boxes warmly welcome visitors.

Practical companions for your adventures

TUMI's Voyageur Collection comprises soft yet durable, lightweight travel and day bags that can be mixed and matched to cater for all aspects of a woman's lifestyle. Whether for business or pleasure, the collection comprises a variety of feminine silhouettes with an emphasis on practicality.

The Spring/Summer 2015 collection infuses excitement with the use of colour juxtaposed with the neutral tones of Fossil and Black. Seasonal floral print is incorporated into the full colour palette, showcasing pops of Periwinkle and Paradise Pink, alongside new core colour, Fossil. The Voyageur design aesthetic is elevated with jewellery-inspired zippers, ribbon-shaped leather zipper pulls and a floating metal TUMI plaque. Select styles feature gold hardware and "kissing" zippers.

Automated windows for the modern home

Breezway offers innovative window solutions in this technology-driven era. Its smart window system Altair® Powerlouvre Windows is an energy-efficient, sleek and elegant solution to window automation designed to electronically manage cross-ventilation and natural air flow. Available in heights of up to 2.7m, the system is available in a range of design applications such as high out-of-reach locations and floor-to-ceiling feature windows.

The Altair® Powerlouvre Window can be operated by the Powerlouvre Appviate Control Unit and Powerlouvre App, allowing wireless communication with a compatible device, or integrated into a building's management system.

Visit www.breezway.com.my for more information.
